

Modernization

The performance and flying qualities of Twin Commander aircraft are legendary. The market demand for these sought after aircraft is always at a premium.

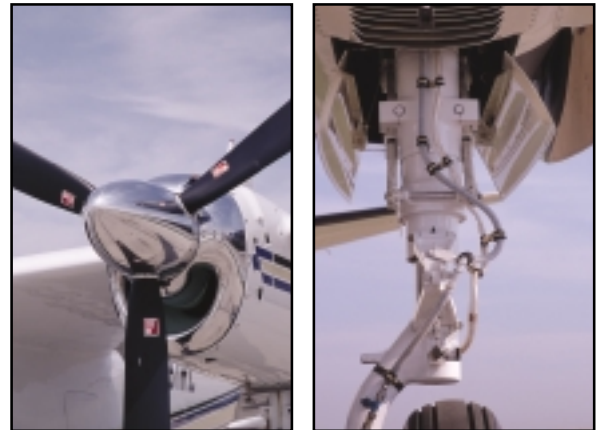

That's why it is important for any Commander owner to take advantage of the many maintenance kits and system upgrade opportunities made available by Twin Commander Aircraft and Byerly Aviation.

Byerly Aviation knows how to maximize the performance and market value of your aircraft by keeping it in the finest condition. Proper care and performance enhancing upgrades keeps your investment at its maximum value.

Maintenance and upgrade kits offered and installed by Byerly for your Commander include:

- Grand Renaissance
- MAGIC Avionics
- Dash 10 Engine Upgrade
- Propeller Upgrades
- Nose Gear Upgrades
- Fuel Cell Replacement
- Permafex Deicer Boots
- Byerly Superquiet Soundproofing
- Byerly Maintenance Programs

Let Byerly help get you the most enjoyment from owning a Twin Commander aircraft.

"I have had numerous trips in our Grand Renaissance Commander since your company completed its conversion. I must say that your people did an outstanding job, all the way through the process as not only the exterior and interior look and feel new, but the plane flies better than the day it came out of the factory."
