

***"Byerly Aviation - No matter the mission, we'll keep you flying."***

Whether you are an aircraft owner, operator, or passenger, you know the advantages of using a private aircraft for your travel needs. Whether the mission is for business or pleasure, a private aircraft offers unmatched flexibility, safety, luxury, and, above all, efficiency.

Byerly Aviation understands that. For over six decades, our family owned company has earned the reputation for being knowledgeable, professional, and expert. Byerly Aviation offers a comprehensive menu of aviation services able to satisfy the demanding needs of business aircraft as well as the people and companies operating them.

Byerly is a world leader in sales and service of Twin Commander aircraft. We employ only expertly trained aviation technicians and service personnel, guaranteeing our customers the highest degree of knowledge and understanding of their aircraft. Safety is our highest priority.

Located on the Greater Peoria Regional Airport in Peoria, Illinois, Byerly is conveniently located in the Midwest, close to several major metropolitan markets.

Byerly is a Factory Authorized Service Center and Repair Station for many of the world's top business aircraft, engine, and avionics manufacturers including Twin Commander Aircraft, Raytheon (Beechcraft), Cessna, Honeywell, and Meggitt Avionics.

Recognized by aircraft owners, operators, and industry peers as the standard for customer satisfaction and quality of work, professionals at Byerly settle for nothing short of perfection when serving our customers.

In 2004 Byerly was the recipient of the FAA's prestigious Diamond Award of Excellence in recognition for achieving 100% participation in FAA's Aviation Maintenance Technician Awards Program. This is the first time in over 6 years of program that any organization in Byerly's region has qualified.

"...among the most impressive parts of the experience with Byerly was your professional attitude and commitment to providing the highest level of customer service."
